Office of Congresswoman Matsui  
Robert T. Matsui US Courthouse  
501-I St., Ste. 12-600  
Sacramento, CA 95814

Dear Congresswoman Matsui:

Thank you again for your recent visit to our headquarters and production facilities in Sacramento. Our entire staff was pleased to meet you and to learn more about your initiatives to create a green tech / clean tech sector in the greater Sacramento area that will be helpful to creating opportunities and jobs for businesses like ours in the future.

Since 1978, Sunoptics has been on a mission of contributing to an energy independent America through Daylighting. 33 years later, our goal of providing high performance prismatic daylighting globally is becoming a reality. As the world yearns for more energy efficiency and sustainable practices, America needs to strive to be the leader in the green tech / clean tech marketplace. Your proposed legislation within the Technology Manufacturing & Export Assistance Act is such a tool that will be the pathway toward this goal that American manufacturers need for the global marketplace.

We at Sunoptics applaud your efforts in enacting legislation that makes both economic and environmental sense and provides America with a vehicle to increase investment, jobs and opportunities for Americans throughout the world. We hope that you will continue your efforts to moving this legislation forward to make this goal a reality. Please let us know if we at Sunoptics can help your efforts in any way.

Sincerely,

Grant Grable, LEED® A.P.  
Vice President, Sales & Marketing  
Principal
